SOUTH SEMINOLE & NORTH ORANGE COUNTY WASTEWATER TRANSMISSION AUTHORITY

410 Lake Howell Road Maitland, FL 32751-5907

February 21, 2023

Authority Board Members
South Seminole and North Orange County
Wastewater Transmission Authority

Dear Authority Board Members:

The **Annual Comprehensive Financial Report** of the South Seminole and North Orange County Wastewater Transmission Authority (Authority) for the year ended September 30, 2021, is hereby submitted. Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with management. To the best of our knowledge and belief, the enclosed data are accurate in all material respects and are reported in a manner that presents fairly the financial position and results of operations of the South Seminole and North Orange County Wastewater Transmission Authority. All disclosures necessary to enable the reader to gain an understanding of the South Seminole and North Orange County Wastewater Transmission Authority's financial activities have been included.

Generally accepted accounting principles (GAAP) require that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The Authority's MD&A can be found immediately following the report of the independent auditors.

Reporting Entity Definition: The Authority, in determining the entity to be reported on, used the Governmental Accounting Standards Board (GASB) Statement No. 14, The Financial Reporting Entity, as amended. The financial reporting entity consists of the primary government, organizations for which the primary government is financially accountable, and the other organizations for which the nature and significance of their relationship with their primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. The Authority has no component units.

Governmental Structure: The South Seminole and North Orange County Wastewater Transmission Authority was created by an Act of Florida Legislature in 1978 as a separate local agency of the government with powers designed to meet the particular needs of the area in relationship to transmission of wastewater to a regional sewage treatment plant (Iron Bridge Treatment Facility).

The Authority, an Independent Special District, encompasses a service area of approximately sixty-eight (68) square miles. It owns and operates an untreated wastewater transmission system located in portions of Seminole County, Orange County, and the Cities of Casselberry, Winter Park, and Maitland. The Authority provides such service to Seminole County, the Cities of Maitland, Casselberry, and Winter Park. Until June 29, 2021, the Authority could have provided service to the City of Winter Springs; however, the Florida Legislature amended the Enabling Act and the City is no longer a member/customer of the Authority as it has its own wastewater system.

Design work for the Authority began in the spring of 1979. Construction grants were obtained from the Environmental Protection Agency (EPA), and Bond Anticipation Notes were issued during 1981 in the amount of \$7,000,000. Construction on the system began in February 1982. Initial flows into the system were begun in February 1983 and the total system completed in the fall of 1983. The Bond Anticipation Notes issued in December 1981 were replaced by Sewer Revenue Bonds in December 1983 and replaced at lower interest rates with bond issues in 1986 and 1993. EPA grants in the amount of \$8,876,992 had been received by September 30, 1984. Upon the pay-off of the 1993 Sewer Revenue Bonds, new bonds were issued in the amount of \$8,515,000 to fund Phase I of the Master Plan-Capital Improvement Projects (CIP).

The facilities owned by the Authority within the service area consist of thirty-five (35) metering points and pump stations and approximately thirty-eight (38) miles of force mains ranging in size from eight inch (8") to thirty-six inch (36") diameters. The Authority also owns a section of forty-two inch (42") and forty-eight inch (48") diameter gravity sewer lines and discharges into the City of Orlando's eighty-four inch (84") diameter gravity sewer for the final leg of transmission and ultimately treatment at the City of Orlando's Iron Bridge Treatment Facility. The Authority's present committed flow through the system is 13.203 million gallons per day (MGD).

The Cities of Maitland, Casselberry, Winter Park, and Seminole County are entitled to representation on the governing board. Each governmental entity appoints one member and one alternate member. The alternate member is authorized by each respective entity to act in all matters for the member during the absence of the member at any duly authorized board meeting. The term of office is four (4) alternating years terminating in successive years on September 30.

The Legislative Act creates a 100-vote basis for conducting business with the first fifty (50) votes divided equally among board members and the remaining fifty (50) votes divided in proportion to the committed capacity for each governmental entity.

The Authority Board Members have the power to represent the Authority and have the exclusive responsibility and power to adopt the annual budget for the operation of the Authority. The Authority does not have the power to levy taxes but receives all revenues from its member entities through Interlocal Agreements.

The Authority has one (1) employee. Duties other than administrative are provided by service contracts. The legal firm of Brown, Garganese, Weiss and D'Agresta, P.A. is the Authority's Attorneys (represented by the same attorney since 1990) and the firm of CHA Consulting (formerly Reiss Engineering) is the Authority's Consulting Engineers. Lombardo Spradley & Klein, CPAs provide accounting services.

OPERATIONAL OUTLOOK

In order to ensure the viability and the financial integrity of the Authority's System, the Act gives the Authority the power to compel all retail sewage collection within its legislated boundaries to utilize its facilities. The Act further gives the Authority the ability to compel by legal proceedings payment by for among other things, the Authority's operation, maintenance and debt service expenses.

Each member entity (customer) of the Authority has executed with the City of Orlando, Uniform Intergovernmental Agreements, whereby Orlando agrees to treat, at the City of Orlando's Iron Bridge Treatment Facility, a certain volume of sewage (committed capacity) generated within each customer's service area. The Authority's user charge system, which has been formalized through Uniform Interlocal Agreements (recently amended and restated) executed between the Authority and each one of its member entities, states that each customer will be billed monthly for its pro rata share of 100% of the Authority's operation, maintenance and depreciation expenses and 110% of the debt service expense of the bond based solely upon its committed flow. Member entities are charged penalties when total committed capacity is exceeded.

With the exception of initial construction in 1982 and 1983 and two State Tribal Assistance Grants in the amounts of \$144,300 (2004) and \$485,000 (2012-2013) from the Environmental Protection Agency, the Authority has not received any Federal or State funding.

Local Economy: As the COVID-19 pandemic subsides the local economy begins to return to normal, once again experiencing the growth in employment and lower unemployment rates of the pre-pandemic years. The area's major industries include Leisure & Hospitality, Professional & Business Services, Retail, and Education & Health. Prior to the pandemic the area's labor force had increased and unemployment rates declined or remained low over the previous 6 years. Economists are predicting that payroll job growth in Central Florida will surpass national job growth as we continue to rebound from the job losses caused by the pandemic.

Long Term Financial Planning: Funding for identified projects is addressed through the existing rate structure which includes a depreciation component. This growth element is reviewed and adjusted annually but may not exceed the actual depreciation of the prior fiscal year. This component is offset according to the required increase in debt service for project funding.

Major Initiatives for the Year: The Authority, by virtue of the Act, is to maintain the system and all components in good condition and operate the same in an economical and efficient manner and does so by making proper expenditures for equipment, repairs and replacements.

The following is a summary of significant accomplishments and project related activities and expenses made by the Authority during the fiscal year:

Since the majority of the Authority's facilities were constructed in the 1970s and 1980s, these original facilities are approaching the end of their useful lives requiring extensive maintenance or have limited capacities. Improvements to the Authority's pumping stations were identified through facility inspections, discussions with the operation and maintenance personnel of the entities and through hydraulic analyses performed via computer modeling. The Authority is presently in the engineering/design/construction phase for major system replacements, and force main relocations. All design flows and criteria for the Authority's system are updated as system changes occur and compared with the calibrated hydraulic model to identify potential capacity and operational issues. Additionally periodic systematic pipe testing is conducted as emphasized in the original Hydraulic Analysis as a proactive approach to identify, maintain, and replace components of the systems before reaching critical stage.

The material and labor shortages caused by COVID-19 created higher construction costs. The Authority focused its efforts on planning, preparing and obtaining additional funding for the capital improvement projects in the Capital Improvement Plan allowing some time for the economy and costs to stabilize.

The engineering firm continued with the engineering and design and coordinating the scheduling of the contractors for the upcoming projects in the Capital Improvement Plan, including lift station renovations, installation of generators and additional replacement of pipe segments that have been identified as reaching the end of their useful life. The Authority now has seven pre-qualified contractors to perform "on call" pump station and pipeline system work.

The Authority expended \$1,190,936 during the year for various improvements, \$610,555 of that was a coordinated effort with the City of Maitland to construct a new lift station.

◆ **Air Release Valve Maintenance Program**

A maintenance program is in effect with a service provider to clean, inspect and maintain the one hundred fifteen (115) valves located throughout the Authority's system. This extends the life of the pipe and pumps through the evacuation of hydrogen sulfide gases and trapped air.

◆ **Manifolded Transmission System**

This ongoing project allows directional flow options from multiple pump stations which permits intermittent low flow lines to be flushed and cleaned, reducing the maintenance requirements due to septic conditions. Additionally it serves as a back-up alternative during emergencies, routine maintenance, and would also allow flows to be diverted to or from the City of Casselberry's Water Reclamation Facility. The valves associated with alternate routes were recently mapped. To date there has been over 18,000 linear feet of force main

transmission piping replaced as a major effort to increase the useful service life of the piping.

◆ **Operation and Maintenance Costs**

Operation and maintenance rates to the entities remain constant.

◆ **Future Capacity**

Members have completed their review of future capacity needs to assist the City of Orlando in analyzing repair/replacement alternatives as well as future capacity needs for the Iron Bridge Treatment Facility.

Major Initiatives for the Future: Roadway widening throughout this rapidly growing area has and will continue to provide an opportunity to improve the system after determining the degree of required line relocation by replacing the affected line with non-corrosive pipe material. Since the Authority System is presently operating at approximately 50% capacity, there are no immediate long-term plans for expanding the system.

Projects and costs contained in the Master Plan (CIP) are annually revisited. Major factors for consideration are as follows:

- Age of infrastructure.
- Potential adverse environmental impacts from damage or failure of components of the infrastructure.
- Operating flexibility and improved emergency response time, which minimizes costs of repairs and replacement.
- Developing alternative funding sources for the Master Plan (CIP) Phase II and Phase III.

These factors translate into constant monitoring of the infrastructure so as to modify the Master Plan as necessary to assure a system that will be effective, efficient, and economical.

FINANCIAL OUTLOOK

Depreciation Reserve Fund: The Depreciation Reserve Fund was established to provide for system relocation costs and other capital improvements to the system. It is funded through a depreciation rate component, dedicated interest earnings, year-end surplus, if any, and monthly excess flow administrative penalty charges. This account is held in the State Board of Administration Local Government Surplus Trust Funds Investment Pool and money market accounts that are insured by federal depository insurance up to \$250,000. Amounts in excess of \$250,000 are fully insured by U.S. Government securities held in the Public Deposit Security Trust Fund maintained and monitored by the Treasurer of the State of Florida. The balance in the Depreciation Reserve Fund on September 30, 2022 was \$6,604,108

Internal Accounting Controls: The Authority's management is responsible for establishing and maintaining internal control designed to ensure that: 1) the assets of the Authority are protected from loss, theft, or misuse; 2) adequate accounting data is compiled to allow for the

preparation of financial statements in conformity with U.S. generally accepted accounting principles; and 3) all transactions and activities are properly authorized. The internal accounting control should provide reasonable, but not absolute, assurance that the objectives are met. The concept of reasonable assurance recognizes that: 1) the cost of a control should not exceed the benefits likely to be derived; and 2) the valuation of costs and benefits requires estimates and judgment by management.

We believe the internal control for functions adequately safeguards assets, provides reasonable assurance of proper recording of financial transactions, and provides for proper authorization of all transactions and activities.

During the year, monthly budgetary reports showing budget and actual revenue and expenses are reviewed by management and made available to the Authority Board. Additionally, the Authority has an independent accounting firm perform the day-to-day bookkeeping \ accounting services.

Relevant Financial Policies:

The Authority is aware of a number of pronouncements issued by the Governmental Accounting Standards Board (GASB) that are effective for this year; however, only one had any discernable impact on the Authority, and there were no changes in any accounting policies (see Note 13 to the financial statements).

OTHER INFORMATION

Independent Audit: The Enabling Legislative Act and Florida State Statutes require an annual audit made by independent certified public accountants. The accounting firm of Holland and Reilly, CPAs was selected by the Authority to audit the 2022 financial statements. The auditors' report on the basic financial statements, which provides an unmodified opinion, is included in the financial section of this report.

Submittal for Award: The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to South Seminole and North Orange County Wastewater Transmission Authority, Maitland, Florida, for its Annual Comprehensive Financial Report (ACFR) for the Fiscal Year ended September 30, 2021; this is the twenty-fifth time the Authority has received the Certificate. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement for Excellence in Financial Reporting, a government unit must publish an easily readable and efficiently organized Annual Comprehensive Financial Report (ACFR), whose contents conform to program standards. Such ACFR must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only.

We believe our current report conforms to the Certificate of Achievement program requirements and we are submitting it to the Government Finance Officers Association (GFOA) for acceptance.

ACKNOWLEDGMENTS

The preparation of the Annual Comprehensive Financial Report on a timely basis would not have been possible without the dedicated service of Lombardo Spradley & Klein CPAs, the contract accountants, and Holland and Reilly, the Authority's Auditors for their contribution to the excellence of this report.

Annual Financial reports are a permanent historical record of the South Seminole and North Orange County Wastewater Transmission Authority's operation for the general public, member entities, Authority Board Members and management. It is our belief that this is a comprehensive report of financial transactions under the control of the South Seminole and North Orange County Wastewater Transmission Authority and that the following statements present an accurate, informative record of the financial activities of the Authority, and its financial condition at September 30, 2022.

We wish to acknowledge the interest, leadership and support of the Board Members in planning and conducting financial operations in a responsible and progressive manner.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "Ed Gil de Rubio".

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of the South Seminole and North Orange County Wastewater Transmission Authority (the Authority), as of and for the year ended September 30, 2022 and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Authority as of September 30, 2022, and the changes in financial position and cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Authority and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Authority's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Authority's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 4 to 7 be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated February 21, 2023, on our consideration of the Authority's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control over financial reporting and compliance.

Orlando, Florida

Holland & Riley

Management's Discussion and Analysis

As financial management of the South Seminole and North Orange County Wastewater Transmission Authority (the "Authority"), we offer readers of the Authority's financial statements this narrative overview and analysis of the financial activities of the Authority for the fiscal year ended September 30, 2022. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal at the front of the report.

Financial Highlights

- Operating income for the Authority was \$2,344,750 for fiscal year 2022. This was an increase of \$257,561 from the previous year, due primarily to an increase in charges for services.
- The Authority's net position increased \$2,111,296 compared to an increase of \$1,750,502 in the prior year due to an increase in charges for services. The term "net position" refers to the difference between assets and liabilities. At the close of fiscal year 2022, the Authority had a net position of \$28,567,502 – an increase from \$26,456,206 in the previous year.
- The Authority reported unrestricted net position of \$8,710,633 at the close of fiscal year 2022, an increase of \$1,782,513 over the September 30, 2021 balance of \$6,928,120.
- The Authority's cash and cash equivalents balance was \$11,615,499 representing a \$2,113,896 increase from the prior fiscal year due to less expenditures on capital projects and increased revenue.
- The Authority's capital outlays were \$1,190,936, a decrease from the prior year's \$1,720,729.
- The Authority had total operating revenues of \$4,549,622 and total operating expenses of \$2,204,872 for fiscal year 2022.
- The Authority's outstanding debt is \$9,320,000, a decrease of \$590,000 from the prior fiscal year.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Authority's financial statements. The Authority's financial statements and notes to the financial statements included in this report were prepared in accordance with U.S. generally accepted accounting principles applicable to governmental entities for proprietary fund types.

Basic Financial Statements

The Authority is a special-purpose government consisting only of a proprietary type enterprise fund whose function is to meet the particular need of the area in relationship to wastewater transmission to a regional sewage treatment plant. The basic financial statements are designed to provide readers with a broad overview of the Authority's finances, in a manner similar to a private-sector business. They consist of the statement of net position, the statement of revenues, expenses and changes in net position, and the statement of cash flows.

The statement of net position presents information on all the Authority's assets and liabilities, with the difference between the two reported as net position. Over time increases or decreases in net position may serve as a useful indicator of whether the financial position of the Authority is improving or deteriorating. The statement of revenues, expenses, and changes in net position presents information showing how the Authority's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event occurs, regardless of timing of unrelated cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., depreciation, and earned but unused compensated absences).

Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the basic financial statements.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain supplementary statistical schedules that cover more than one fiscal year that reflect the population of member entities, annual flows, and financial trends of the Authority.

Financial Analysis

	<u>September 30,</u>	
	<u>2022</u>	<u>2021</u>
ASSETS		
Current and other assets	\$ 11,729,297	\$ 9,633,343
Capital assets, net	<u>28,223,327</u>	<u>28,508,985</u>
Total assets	<u>\$ 39,952,624</u>	<u>\$ 38,142,328</u>
LIABILITIES AND NET POSITION		
Liabilities:		
Current liabilities (Payable from current assets)	80,191	55,911
Current liabilities (Payable from restricted assets)	1,978,351	1,709,631
Long-term liabilities, including current portion	<u>9,326,580</u>	<u>9,920,580</u>
Total liabilities	<u>11,385,122</u>	<u>11,686,122</u>
Net Position:		
Net investment in capital assets	18,902,609	18,584,471
Restricted	954,260	943,615
Unrestricted	<u>8,710,633</u>	<u>6,928,120</u>
Total net position	<u>\$ 28,567,502</u>	<u>\$ 26,456,206</u>

Assets exceeded liabilities by \$28,567,502. This represents an increase in total assets of \$1,810,296 (4.7%), and a decrease of total liabilities of (\$301,000) (2.5%) over the previous year. The increase in total assets was primarily due to an increase in cash and cash equivalents. The decrease in total liabilities was primarily due to payments on long-term debt. A portion of net position (\$954,260) is restricted for debt service and renewal and replacement reserves. Funds were used to pay for investments in capital assets of \$1,190,935, primarily for various construction in progress projects (\$782,252). This is a (\$515,794) decrease in investments in capital assets compared to those made by the Authority in 2021 of \$1,706,729.

By far, the largest portion of the Authority's net position (66%) reflects its investment in capital assets (e.g., land, buildings, equipment and system facilities, and construction in progress) less any related debt used to acquire those assets that is still outstanding. The Authority uses these capital assets to operate a wastewater transmission line and consequently, those assets are not available to liquidate liabilities or other spending. Of the \$28,223,327 in capital assets, \$910,248 represents construction in progress which includes engineering studies and design work for future pump station renovations, line replacements and utility relocations, as well as generator replacement and a handicap ramp.

Changes in Net Position

	for the year ended September 30,	
	2022	2021
Revenues:		
Operating revenues	\$ 4,549,622	\$ 4,143,800
Investment income	57,130	9,293
Total revenue	4,606,752	4,153,093
Expenses:		
Operating expenses	2,204,872	2,056,611
Interest expense	201,481	214,292
Loss on disposal of equipment	89,103	131,688
Total expenses	2,495,456	2,402,591
Increase in net position	2,111,296	1,750,502
Beginning net position	26,456,206	24,705,704
Ending net position	\$ 28,567,502	\$ 26,456,206

Operating revenues increased by \$453,659 and operating expenses slightly increased by \$92,865 in 2022. The increase in operating revenues was budgeted for additional repairs and maintenance required to maintain the system and to increase the depreciation reserve for anticipated significant expenses on future projects and implement system maintenance programs. The decrease in operating expenses was mainly due to a decrease in system maintenance expenses. A significant portion of operating expenses relates to depreciation, which was \$1,387,490 (63%) in 2022 and \$1,323,473 (64%) in 2021.

The increase in net position of \$2,111,296 is up from the prior year's increase of \$1,750,502 mainly due to the increase in charges for services and investment income, and a smaller loss on disposal of equipment this year. The loss on disposal of equipment represents the original depreciated costs of certain capital assets that are being replaced in the Authority's system improvement program, as well as some items that were disposed of during 2022.

Capital Asset and Debt Administration

Capital Assets

The Authority's investment in capital assets was \$28,223,327, net of accumulated depreciation, as of September 30, 2022, a net decrease of (\$285,658), primarily due to the depreciation expenses exceeding the outlays for capital assets. Capital assets include land, buildings, system facilities, furniture, fixtures and equipment, and construction in progress. Major capital asset events during the fiscal year pertained to a generator replacement, the continuance of various projects under construction, as well as the commencement of several projects for engineering studies and design work for future pump station renovations and line replacements. Additional information on the Authority's capital assets can be found in note 6 on page 16 of this report.

Long-Term Debt

The Authority has outstanding bonds payable of \$9,320,000, a reduction of \$590,000 during fiscal year 2022 due to the payments on the long-term debt.

The Authority's debt service coverage ratio increased from 4.24 for fiscal year 2021 to 4.75 for fiscal year 2022. The increase in debt service ratio was primarily because the charges for services increased. Additional information on the Authority's long-term debt can be found in note 8 on pages 17-18 of this report.

Requests for Information

This financial report is designed to provide a general overview of the Authority's finances for all those with an interest in its finances. Questions concerning any of the information provided in this report, or requests for additional financial information, should be addressed to the Executive Director, South Seminole and North Orange County Wastewater Transmission Authority, 410 Lake Howell Road, Maitland, Florida 32751.

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

1. Organization

The South Seminole and North Orange County Wastewater Transmission Authority (the Authority) was formed in October 1978 by Legislative Act of the State of Florida to construct and operate a wastewater transmission line to be the prime source of conveyance of wastewater collected in the service area of its five members (Seminole County and the Cities of Winter Park, Casselberry, Maitland, and Winter Springs) to the Iron Bridge Regional Treatment Plant owned by the City of Orlando. During the year ended September 30, 2021, the Enabling Act was amended by the Florida Legislature and the City of Winter Springs is no longer a member/customer of the Authority.

Each of the Authority's members is bound, through uniform interlocal agreements, to pay its pro-rata share of the Authority's operation and maintenance expenses and annual bond debt service requirements. All of the Authority's program revenues (charges for services) come from four of its five customers.

These financial statements consist only of the Authority's operations; there are no component units.

2. Summary of Significant Accounting Policies

Basis of Presentation - The Authority is accounted for as a proprietary type enterprise fund. Enterprise funds are used to account for activities that are financed and operated in a manner similar to private business enterprises and is mandatory in the following situations: 1) the activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity, 2) laws or regulations require that all costs of providing services, including capital costs, be recovered from fees and charges, or 3) fees and charges are designed to recover the costs of the activity, including capital costs.

Basis of Accounting - These financial statements are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles. Under the accrual basis of accounting, revenues are recognized when earned; expenses are recognized when incurred. The assets, liabilities, and net position of the Authority are reported in a self-balancing set of accounts, which include restricted and unrestricted resources, representing funds available for support of the Authority's operations.

When both restricted and unrestricted resources are available for use, it is the Authority's policy to use restricted resources to the extent they are available, then to unrestricted resources.

Cash and Cash Equivalents - For purposes of the statement of cash flows, the Authority considers all highly liquid investments (including restricted assets) with maturity of three months or less when purchased to be cash equivalents. The Authority's cash equivalents included in restricted assets and the depreciation reserve (see notes 4 and 5) consist of funds invested with the State of Florida Board of Administration Local Government Surplus Funds Trust Fund Investment Pool (SBA) and money market funds collateralized by U.S. Government obligations, with the fair value equal to the carrying value. The Authority's bank deposits are held by qualified state depositories that, under state law, are required to be collateralized by U.S. government obligations held by the various financial institutions.

Accounts Receivable - Accounts receivable represents amounts due from a member entity for operations and maintenance and excess flow charges. No allowance for doubtful accounts is necessary.

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

2. Summary of Significant Accounting Policies - Continued

Operating Revenues and Expenses – The Authority's operating revenues and expenses consist of revenues earned and expenses incurred relating to the operation and maintenance of its system, including administrative expenses and depreciation of capital assets. All other revenues and expenses are reported as non-operating revenues and expenses.

Capital Assets – Capital assets are stated at cost to the Authority when purchased or constructed and at acquisition value when donated. The significant portion of capital assets is comprised of infrastructure assets, such as sewer pipes and lines. Expenditures for capital asset additions and improvements with a cost of \$500 or more are capitalized. Expenditures for maintenance and repairs are charged to operating expenses.

Provisions for depreciation are made using the straight-line method, based upon the estimated useful lives of the assets, which range as follows:

<u>Assets</u>	<u>Years</u>
Buildings	40
Building improvements	10
Furniture, fixtures, and equipment	5-7
System facilities	5-50

Capitalization of Interest – In a prior year, the Authority early-implemented Statement No. 89 of the Governmental Accounting Standards Board (GASB), *Accounting for Interest Cost Incurred Before the End of a Construction Period*, which states that interest costs should be expensed rather than capitalized along with related capital expenditures.

Estimates - The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. Cash and Cash Equivalents

Cash and cash equivalents are carried at cost. Demand deposits and money market accounts are insured by federal depository insurance up to \$250,000 of the aggregate account balances. Amounts in excess of \$250,000 are fully insured by U.S. Government securities held in the Public Deposit Security Trust Fund (Pool) maintained and monitored by the Treasurer of the State of Florida. The Pool provides for additional assessments to members of the pool to ensure that there will be no loss of public funds. At September 30, 2022, the carrying amount of the Authority's demand deposits was \$1,474,498, and the respective bank balance totaled \$1,504,675.

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

4. Restricted Assets

Cash equivalents and investments included in restricted assets, current and noncurrent, at September 30, 2022 consist of the following:

Account	Carrying Value
Infiltration and Inflow Rehabilitation Fund	\$ 1,876,751
Debt Service Reserve	571,284
Interest	100,882
Principal	605,000
Renewal and Replacement	382,976
Capital Projects	1,014,059
Depreciation Reserve	<u>6,604,108</u>
	<u>\$ 11,155,060</u>

The funds above are invested as follows:

Demand deposits	\$ 1,719,941
SBA Florida PRIME	<u>9,435,119</u>
	<u>\$ 11,155,060</u>

These amounts are reflected in the Statement of Net Position as follows:

Current assets	\$ 3,596,692
Noncurrent assets	<u>7,558,368</u>
	<u>\$ 11,155,060</u>

The bond covenants permit the Authority to invest in obligations of the U.S. Government or other agencies or instrumentalities of the United States. Further, the Authority may invest in commercial paper, any general obligation of any state or political subdivision with a rating in one of the two highest rating categories by a nationally recognized bond rating agency, certificates of deposits with a Federal Reserve System member bank, units of participation in Local Government Surplus Funds Trust Funds or any other investment permitted under applicable Florida and United States law and/or approved by the insurer in writing. The Authority's policy with respect to concentrations of credit risk states "Assets shall be diversified to control the risk of loss resulting from over concentration of assets in specific maturities, issuer, and security issues." The Authority invests primarily in the SBA and demand deposit accounts.

The SBA established the Florida PRIME whereby participants own a share of the pool and not the underlying securities.

The Florida PRIME (formerly known as Pool or Fund A) is an external investment pool that meets all of the necessary criteria to elect to measure all of the investments in the Florida PRIME at amortized cost. Therefore, the Authority's investment in Florida PRIME is reported at amortized cost. The fair value of the position in the pool is equal to the value of the pool's shares. The Florida PRIME is rated by Standard and Poor's and is currently rated AAAm. At September 30, 2022, the weighted average days to maturity (WAM) is 21 days, and the weighted average life (WAL) is 72 days. Next interest rate reset dates for floating rate securities are used in the calculation of the WAM.

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

4. Restricted Assets - Continued

The Florida PRIME did not participate in a securities lending program during the year ended September 30, 2022, nor was it exposed to any foreign currency risk. The SBA provides separate financial statements for the Florida PRIME (audited) as of and for the period ending June 30, which can be obtained at www.sbafla.com/prime/home.aspx. It does not issue financial statements as of and for the period ending September 30.

At September 30, 2022, there were no redemption fees or maximum transfer amounts, or any other requirements that serve to limit a participant's daily access to 100% of their account balance. With regard to liquidity fees, the SBA has the authority to impose penalties for early withdrawal, but has not made any required disclosures relating to these fees. The SBA also has the authority to limit contributions or withdrawals for up to 48 hours in the event of an occurrence or event that has a material impact on the liquidity of the Florida PRIME. No such limitation took place during the year ended September 30, 2022.

The Infiltration and Inflow Rehabilitation Fund Account was established by the Authority in 1988 for the collection of excess flow penalties from customers that exceeded their daily committed flow allocation. An amount equal to the excess flow penalty is recorded in an account called "due to other governmental units" when the funds are collected. The funds are returned to the customer from whom they were collected after the customer has completed infiltration and inflow rehabilitation services to correct the excess flow.

5. Depreciation Reserve Account

The Depreciation Reserve Account was originally established by the Board of Directors to replace fully depreciated assets. The account is funded by a depreciation rate component which is authorized in the interlocal agreements and the Revenue Bond Series 2004 resolution (supplemented by the Revenue Bond Series 2016A and 2016B resolutions) and excess charges for service after all restricted accounts have been fully funded as required by the bond resolution. The bond resolutions specify that this account may be used for the purpose of paying extraordinary and nonrecurring costs for removal and transfer of used and useable capital facilities caused by governmental requirements or directives. Funds may also be used for paying the costs of extensions, enlargements or additions to, or the replacement of capital assets of the system and emergency repairs thereto. In addition, if no other funds are available, funds may be used to pay for operation/maintenance expenses on a non-recurring basis caused by unforeseen circumstances.

Activity in the Depreciation Reserve Account for the year ended September 30, 2022 is as follows:

Balance at October 1, 2021	\$ 4,594,097
Addition:	
Deposits from member entities	2,580,676
Transfers from capital projects checking account	575,256
Interest income	45,015
Reductions:	
Payments for cost of capital assets	<u>(1,190,936)</u>
Balance at September 30, 2022	<u>\$ 6,604,108</u>

7. Construction Commitments

The Authority has active construction projects as of September 30, 2022. The projects include design work and engineering studies for future line replacement and pumping station rehabilitation. At year end, the Authority's commitments with engineers are as follows:

	<u>Spent to date</u>	<u>Remaining commitment</u>
Construction projects	<u>\$251,179</u>	<u>\$306,233</u>

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

8. Long-Term Debt

A summary of changes in long-term debt is as follows:

	<u>Beginning balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending balance</u>	<u>Due within one year</u>
Compensated absences	\$ 10,580	\$ 4,000	(\$ 4,000)	\$ 10,580	\$ 4,000
Series 2016A bonds	4,800,000	-	(275,000)	4,525,000	280,000
Series 2016B bonds	<u>5,110,000</u>	<u>-</u>	<u>(315,000)</u>	<u>4,795,000</u>	<u>325,000</u>
	<u>\$ 9,920,580</u>	<u>\$ -</u>	<u>(\$ 590,000)</u>	<u>\$ 9,330,580</u>	<u>\$ 609,000</u>

During fiscal year ended September 30, 2016, the Authority issued two series of bonds as follows:

Series 2016A - For the purpose of financing major capital improvements. The \$5,590,000 Authority Sewer System Revenue Bonds, Series 2016A, dated June 9, 2016, are due on October 1 of each year beginning 2019 through 2035, with interest at 2.17% payable semi-annually on April 1 and October 1 (commencing 2017 for interest only through 2018). These bonds are collateralized by a pledge of the net revenues derived by the Authority from the operations of the sewer system, and are classified as Additional Parity Obligations.

Series 2016B - For the purpose of refunding the Authority Sewer System Revenue Bonds, Series 2004. The \$6,410,000 Authority Sewer System Revenue Bonds, Series 2016B, dated June 9, 2016, are due on October 1 of each year beginning 2017 through 2035, with interest at 2.16% payable semi-annually on April 1 and October 1. These bonds are collateralized by a pledge of the net revenues derived by the Authority from the operation of the sewer system, and are classified as Additional Parity Obligations.

As a result of the refunding, the Authority will save \$1,702,516 over the life of the bonds. Discounted at 2.16%, this savings has a net present value of \$1,399,123. The Authority does not have any outstanding deferred debt.

Annual service requirements to maturity for the sewer system revenue series 2016A are as follows:

<u>Year ending September 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>	<u>Interest rate</u>
2023	\$ 280,000	95,155	375,155	2.17%
2024	285,000	89,024	374,024	2.17%
2025	295,000	82,731	377,731	2.17%
2026	300,000	76,276	376,276	2.17%
2027	305,000	69,711	374,711	2.17%
2028-2032	1,630,000	245,210	1,875,210	2.17%
2033-2036	<u>1,430,000</u>	<u>62,930</u>	<u>1,492,930</u>	2.17%
	<u>\$ 4,525,000</u>	<u>\$ 721,037</u>	<u>\$ 5,246,037</u>	

Annual debt service requirements maturity for the sewer system revenue series 2016B bonds are as follows:

<u>Year ending September 30,</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>	<u>Interest rate</u>
2023	\$ 325,000	100,062	425,062	2.16%
2024	330,000	92,988	422,988	2.16%
2025	340,000	85,752	425,752	2.16%
2026	345,000	78,354	423,354	2.16%
2027	355,000	70,794	425,794	2.16%
2028-2031	1,875,000	235,278	2,110,278	2.16%

	<u>\$ 4,795,000</u>	<u>\$ 703,242</u>	<u>\$ 5,498,242</u>	

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

8. Long-Term Debt - Continued

Under terms of the bonds payable, upon any default as specified in the bond documents (any representation or warranty made in writing proven to be false or incorrect in any material respect on the date made or reaffirmed; or failure to pay amounts when due) the interest rate shall increase by 5 percentage points in excess of the Bond's Prime Rate of interest at the time of the default. Acceleration of the principal and interest shall not be a remedy upon the occurrence or continuation of the default.

The resolutions authorizing the Series 2016A and 2016B bonds keeps in force many of the provisions of the Master Resolution that issued the Series 2004 bonds, and amends or supplements various provisions. Accordingly, the 2016 resolutions maintain or establish the following restricted accounts. The purpose of the accounts in order of priority of monthly revenue transfers is as follows:

- | | |
|---------------------------------|--|
| A. Revenue Fund | Deposit gross revenues of the Authority's system. |
| B. Debt Service Fund | Shall maintain the Principal Account and the Interest Account as follows: |
| 1. Interest Account | Deposit 1/6 of the interest income becoming due on the next semi-annual interest payment. |
| 2. Principal Account | Deposit 1/12 of the principal due on the next maturity date for the bonds. |
| C. Reserve Fund | Deposit amount necessary to bring the account balance equal to the maximum amount of principal and interest becoming due in any ensuing fiscal year. |
| D. Renewal and Replacement Fund | Deposit 1/12 of 5% of the gross revenues received during the immediately preceding year until the balance is equal to \$300,000. |
| E. Project Fund | Deposit remaining funds to be used for paying project costs. |
| F. Depreciation Reserve Fund | Deposit an amount as shall be determined by the annual budget of the Authority. |
| G. Surplus Fund | Deposit excess Revenue Fund moneys after all above payments have been made. |

9. Pension Plan

Defined Contribution Plan

The Authority set up a Defined Contribution Plan under Internal Revenue Code Section 401(a) with the Florida Municipal Pension Trust Fund. This plan is pursuant to the Florida Retirement System Opt-out for all new employees hired on or after January 1, 1996. One employee participated in this plan during the year.

Employer contributions are \$2,000 a month. There are no employee contributions. Contributions for the year ended September 30, 2022 were \$24,000. Contributions vest after three years of service; however, contributions vest immediately upon death, disability, or termination of the Plan. Forfeitures are held in a forfeiture account and used to reduce future employer contributions. There were no forfeitures at September 30, 2022.

At September 30, 2022 the Authority had no outstanding payable for any unpaid legally required contribution to the Plan.

**SOUTH SEMINOLE AND NORTH ORANGE COUNTY
WASTEWATER TRANSMISSION AUTHORITY
NOTES TO THE FINANCIAL STATEMENTS**

10. Deferred Compensation Plan

In prior years, the Authority had one full-time employee who participated in a deferred compensation plan that was created in accordance with Internal Revenue Code Section 457. That employee retired in May 2013 and the Authority no longer makes contributions to the Plan.

Funds are held in trust by a third-party administrator; thus the assets and related liabilities are not reflected in these financial statements.

11. Commitments and Contingencies

The Authority is exposed to various risks of loss related to torts, theft of, damage to, and destruction of assets; errors and omissions; and natural disasters for which the Authority carries commercial insurance. There have been no significant reductions in insurance coverage from the prior year. No settlements have exceeded the Authority's insurance coverage for each of the past three years.

In the normal course of business, the Authority has commitments and claims. The Authority does not believe any liability that may result from these matters would have a material effect on its financial position.

12. Subsequent Events

Management has evaluated events and transactions for potential recognition or disclosure through February 21, 2023, the date on which the financial statements were available to be issued.

13. New Accounting Standards

The Governmental Accounting Standards Board (GASB) issued several pronouncements that are effective for these financial statements. These are:

GASB Statement 87 - Leases

GASB Statement 89 - see Note 2 – Capitalization of Interest

GASB Statement 92 - Omnibus

GASB Statement 93 - Replacement of Interbank Offered Rates

GASB Statement 97 - Certain Component Unit Criteria and Section 457 Plans

GASB Statement 98 - The Annual Comprehensive Financial Report

Management has ascertained that most of these professional pronouncements effective for this year had no discernable impact on the Authority. However, GASB Statement 89 was early implemented in a prior year, and the Authority is adopting and complying with GASB Statement 98 by using the new reference to the “Annual Comprehensive Financial Report”.

This page intentionally left blank.

STATISTICAL SECTION

The Statistical Schedules differ from other financial presentations because they generally disclose more than one fiscal year and may present non-accounting data such as social and economic data and financial trends of the Authority.

TABLE

Financial Trends

PAGE

These schedules contain information to help the reader understand how the Authority's financial performance and well-being have changed over time.

I	Net Position by Component	22
II	Changes in Net Position	23

Debt Capacity

These schedules present information to help the reader assess the affordability of the Authority's current levels of outstanding debt and the government's ability to issue additional debt in the future.

III	Debt Service Requirements and Long-term Debt	24
-----	--	----

Operating Information

These schedules contain service and infrastructure data to help the reader understand how the information in the Authority's financial report relates to the services the Authority provides and the activities it performs.

IV	Percentage of Committed Capacity of Member Entities	25
V	Percentage of Iron Bridge Facility Committed Capacity	26
VI	Annual Flow – Millions of Gallons Transmitted to Iron Bridge Facility	27

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which the Authority's financial activities take place.

VII	Demographic and Economic Statistics	28
VIII	Principal Employers	29
IX	Miscellaneous Statistics	30

Except where noted, the information is derived from the Authority's comprehensive financial reports for the relevant year.

Debt service coverage is for the Authority's Sewer System Revenue Bonds, Series 2004 only for year 2013.

No debt service requirements existed for the Authority's Sewer System Revenue Bonds Series 2012 in F/Y September 30, 2013.

(1) Includes Charges for Service, Interest earnings, Miscellaneous revenue, Gain (loss) on investments, and Capital contributions.

(2) The ratio is calculated on the populations of Seminole County, Maitland and Winter Park, as Casselberry and Winter Springs are included in Seminole County's population. The years 2013 to 2016 have been restated to conform.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Board of Directors
South Seminole and North Orange County
Wastewater Transmission Authority

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of South Seminole and North Orange County Wastewater Transmission Authority (the Authority) as of and for the year ended September 30, 2022, and the related notes to the financial statements, which collectively comprise the Authority's basic financial statements as listed in the table of contents and have issued our report thereon dated February 21, 2023.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Authority's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Authority's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the preceding paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We identified a deficiency in internal control described in the accompanying auditor's comments and recommendations on page 34 as item No. 2022-01 that we consider to be a material weakness.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Authority's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Authority's Response to Finding

Government Auditing Standards requires the auditor to perform limited procedures on the Authority's response to the finding identified in our audit and described in the accompanying management letter on page 36. The Authority's response was not subjected to the other auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on the response.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Authority's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Authority's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT ACCOUNTANTS' REPORT ON COMPLIANCE WITH FLORIDA STATUTES 218.415 – INVESTMENTS OF PUBLIC FUNDS

Board of Directors
South Seminole and North Orange County
Wastewater Transmission Authority

We have examined the South Seminole and North Orange County Wastewater Transmission Authority's (the Authority) compliance with Section 218.415, Florida Statutes during the fiscal year ended September 30, 2022. Authority management is responsible for the Authority's compliance with those requirements. Our responsibility is to express an opinion on the Authority's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the Authority complied, in all material respects, with the specified requirements referenced above. An examination involves performing procedures to obtain evidence about whether the Authority complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on the Authority's compliance with specified requirements.

In our opinion, the South Seminole and North Orange County Wastewater Transmission Authority complied, in all material respects, with the aforementioned requirements for the fiscal year ended September 30, 2022.

This report is intended solely for the information and use of the Florida Auditor General, the Board of Directors of the South Seminole and North Orange County Wastewater Transmission Authority, and applicable management, and is not intended to be and should not be used by anyone other than these specified parties.

Orlando, Florida

MANAGEMENT LETTER

AUDITORS' COMMENTS AND RECOMMENDATIONS

2022-01 Lack of Segregation of Duties

The size of the Authority's accounting and administrative staff precludes certain internal controls that would be preferred if the office staff were large enough to provide optimum segregation of duties. However, management is aware of this situation and should continue to exercise a high level of management review and supervision. Also, the Board of Directors should remain involved in the financial affairs of the Authority to provide oversight and independent review functions.

OTHER MATTERS

In accordance with the Rules of the Auditor General of the State of Florida, the following is noted:

1. Based on our audit procedures performed, we determined that the Authority did not meet any of the conditions described in Florida Statutes Section 218.503 (1).
2. The Authority was formed in October 1978 by Legislative Act 78-617 of the State of Florida.
3. The auditors applied financial condition assessment procedures per Auditor General Rule 10.556(8). It is management's responsibility to monitor the Authority's financial condition, and our financial condition assessment was based in part on representations made by management and the review of financial information provided by same.
4. Per Auditor General Rule 10.554(1)(i)6, independent special districts are required to present specific information by management. The following information is presented by management and the auditor provides no assurance on this information:
 - a. Total number of district employees compensated in the last pay period of the Authority's fiscal year being reported - one (1) employee.
 - b. Total number of independent contractors to whom compensation was paid in the last month of the Authority's fiscal year being reported – five (5) independent contractors
 - c. All compensation earned or awarded to employees, whether paid or accrued, regardless of contingency - \$68,425
 - d. All compensation earned or awarded to nonemployee independent contractors, whether paid or accrued, regardless of contingency - \$760,069
 - e. Each construction contract with a total cost of at least \$65,000 approved by the Authority that is scheduled to begin on or after October 1 of the fiscal year being reported, together with the total expenditures for such project – The Authority has budgeted \$3,893,500 for sewer system replacement and renovation projects for the years ending September 30, 2023 and 2024. These projects are in the engineering phase and one contract has been awarded as of September 30, 2022. The budgeted projects include:
 - 1) C-200 Pipe Replacement - \$1,344,000
 - 2) Maitland Master Lift Station Interlocal Agreement - \$1,200,000 (\$500,000 spent to date)
 - 3) Lift Station Renovation Projects - \$1,349,500
 - f. A budget variance report has been presented as required – see page 35.

STATUS OF PRIOR YEAR COMMENTS

2021-01 See Comment No. 2022-01, which has been reported in the past eleven audit reports.

**South Seminole and North Orange County
Wastewater Transmission Authority
Budgetary Comparison Schedule
For the year ended September 30, 2022**

	Budgeted Amounts	Actual	Variance with Final Budget-
	Original and Final	Budgetary Basis	Positive (Negative)
Revenues			
Charges for services	\$ 4,533,892	4,549,622	(15,730)
Investment income	13,000	57,130	(44,130)
Total revenues	<u>4,546,892</u>	<u>4,606,752</u>	<u>(59,860)</u>
Expenses			
Personal services	121,652	123,103	(1,451)
Maintenance	500,000	274,080	225,920
Contractual services	473,000	380,589	92,411
Depreciation	2,580,676	1,387,490	1,193,186
Other	51,799	39,610	12,189
Principal payment on bonds	605,000	605,000	-
Interest expense	201,764	201,481	283
Loss on disposal of equipment	-	89,103	(89,103)
Total expenditures	<u>4,533,891</u>	<u>3,100,456</u>	<u>1,433,435</u>
Excess of revenue over expenses	13,001	1,506,296	1,373,575
Net Position			
Beginning of year	<u>25,866,206</u>	<u>25,866,206</u>	<u>-</u>
End of year	<u>\$ 25,879,207</u>	<u>27,372,502</u>	<u>1,373,575</u>

Note - This budgetary comparison schedule is prepared by management as required by Florida Auditor General Rule 10.554(1)(i)6f, and the auditor provides no assurance on this document.

Note - The budget is prepared on the budgetary basis of accounting. Actual amounts have been modified to conform to the budgetary basis of accounting. The Authority's main source of revenue is the annual contributions from the member entities. The calculation of the required annual contribution includes three components: operations, debt service, and future capital outlay. Therefore the Authority's annual budget reflects the projected cash outflow necessary to pay the current bond principal due which is not in accordance with generally accepted accounting principles.

Explanation of differences between the budgetary and actual revenues and expenses:

Expenses:

Budgetary Comparison Schedule - Principal payment on bonds	\$ 605,000
Difference	<u>(605,000)</u>
Statement of Revenues, Expenses and Changes in Net Position	<u>\$ -</u>

SOUTH SEMINOLE & NORTH ORANGE COUNTY WASTEWATER TRANSMISSION AUTHORITY

February 21, 2023

Ms. Sherrill F. Norman, CPA
Auditor General
Local Government Audits/342
Claude Pepper Building, Room 401
111 West Madison Street
Tallahassee, FL 32399-1450

Subject: Management response to Auditors' comments and recommendations on Fiscal Year 2021-2022 Financial Statements

Dear Ms. Norman:

In accordance with the rules of the Auditor General, I am submitting my written response to the auditors' comments and recommendations on the Fiscal Year 2021-2022 Financial Statements, which were received on February 21, 2023 as follows:

2022-01: We will continue to provide management review and supervision as well as oversight by the Authority Board regarding optimum segregation of duties due to the limited number (one employee) of accounting and administrative staff.

The Executive Director reviews all bank statements on-line and performs a review for any unusual activity. The Board of Directors reviews and ratifies monthly financial statements (which consist of actual results and comparisons to budget) at regular Board of Directors meetings. A review of specific financial activities that took place that month are also deliberated.

Sincerely,

Ed Gil de Rubio
Executive Director
